Instructor Support in the Learning Journeys:

In both the Developer and Consultant Learning Journeys, participants are provided with dedicated **instructor support** to enhance their learning experience. The support is tailored to foster a deeper understanding of the course materials and to address any questions or concerns that arise throughout the learning process. Here are the ways in which participants are assisted:

- **ILT Webinars (Instructor-Led Training):** Participants have the opportunity to engage in live webinars with instructors. During these interactive sessions, students can ask questions, seek clarification, and discuss relevant topics directly with the instructors. ILT Webinars ensure that learners receive real-time guidance and personalized attention from experienced professionals.
- **"Ask the Expert" Sessions:** Regularly scheduled ILT webinars, known as "Ask the Expert" sessions, provide a platform for participants to pose their queries and receive comprehensive answers. These hour-long sessions are dedicated to addressing specific concerns and fostering a collaborative learning environment.
- **Instructor Support in all Booster Programs:**
Additionally, in all Booster programs included in both Learning Journeys, participants will benefit from ongoing instructor support. The instructors will be available to assist learners in navigating through the course content, clarifying concepts, and offering expert guidance to maximize the impact of their learning.

With this comprehensive instructor support, participants can confidently embark on their learning journey, knowing that professional assistance and mentorship are readily available to aid their progress.
